

## ▶ The Opportunities

**What Can Be Improved?** If you ever have found yourself doing the following:

- Entering Information Twice
- Manually Pricing Change Orders
- Entering Data Into Customer Forms

Then chances are pretty good that you can improve the process through custom spreadsheet solution development.

**What Can Excel Do?:** Excel is a very powerful tool. Most users only tap into 2-5% of it's functionality.

By tapping into the other 95% you can see huge gains in productivity by automating more of your processes and linking them together with data live from your accounting and estimating software.

## ▶ How We Can Help

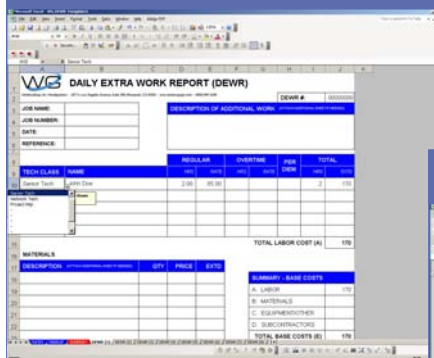

**Custom Solutions:** We will work with you to figure out the process you are trying to automate and then determine the best Excel solution.

**Canned Solutions:** Many of the things done in the construction industry don't vary much from company to company. We have a lot of solutions that are ready to go.

**Construction Excel Training:** We provide company-specific training on using Excel focused on estimating, project management and field management.
